

Lgm\_RatFunInt

```
graph RL; Lstar --> PredictMlat1; PredictMlat1 --> Lgm_RatFunInt; _wrap_Lgm_RatFunInt --> Lgm_RatFunInt;
```

The diagram illustrates the dependencies of the `Lgm_RatFunInt` module. It is a gray-shaded box on the left. Two arrows point to it from the right: one from the `_wrap_Lgm_RatFunInt` box (top) and one from the `PredictMlat1` box (bottom). The `PredictMlat1` box is further dependent on the `Lstar` box, which is to its right.
